

Carlsberg enhances cybersecurity posture and automates processes with Remedio

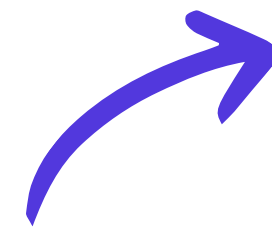

“ Misconfigurations are tricky because you never know what you’ll break. With Remedio, it’s different. Knowing that remediation is risk-free, we can act with speed and confidence.

Tal Arad, Carlsberg CISO & Head of Technology

To keep up with evolving cybersecurity challenges, Carlsberg needed to harden its endpoints and improve oversight. Partnering with Remedio, the company endeavored to achieve and sustain a more robust security posture.

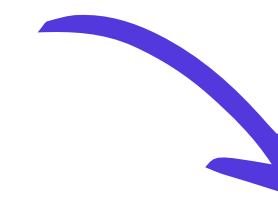

Situation

Solution

Carlsberg deployed Remedio to automate misconfiguration detection and streamline remediation for its global device fleet.

Success

Using Remedio, Carlsberg continually monitors and secures 25,000 devices globally. The attack surface has been **reduced**, manual efforts have been **minimized**, MTTR has been **halved**, and human error has been **removed** from the equation.
