

Remedio In Action

Powering Measurable Outcomes for Real Businesses

Built with ROI in mind, Remedio helps Operations teams better account for security risks and Security teams better account for operational risks.

The result is less friction, greater alignment, better hardened endpoints, and higher productivity.

On average, businesses spend **4%** of their total budgets on IT and **13%** of their IT budgets on cybersecurity. And still... Attacks hit **80%** of businesses, eroding up to **9%** of enterprises of annual revenues.

This is because traditional security tools don't address human error, which account for...

90%
of security incidents

Remedio takes a different approach

Baking the business into security and security into the business - including the all the biggest breeding grounds for human error. On average, this delivers...

50%+

faster mean time to repair (MTTR)
